NVB Preservation

- Selective High Fascial Release

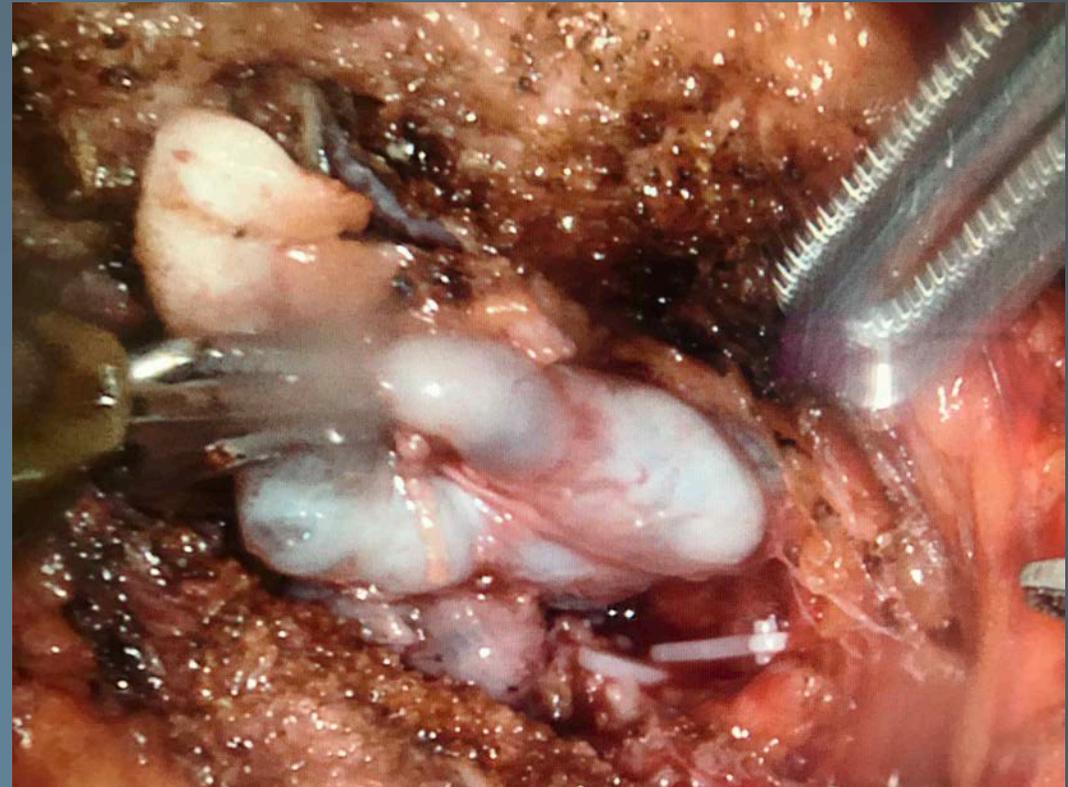

NVB Preservation

- Skills including Antegrade and retrograde nerve dissection are optimal to address all clinical scenarios. Leave the most difficult nerve dissection till last

Seminal vesicles handling

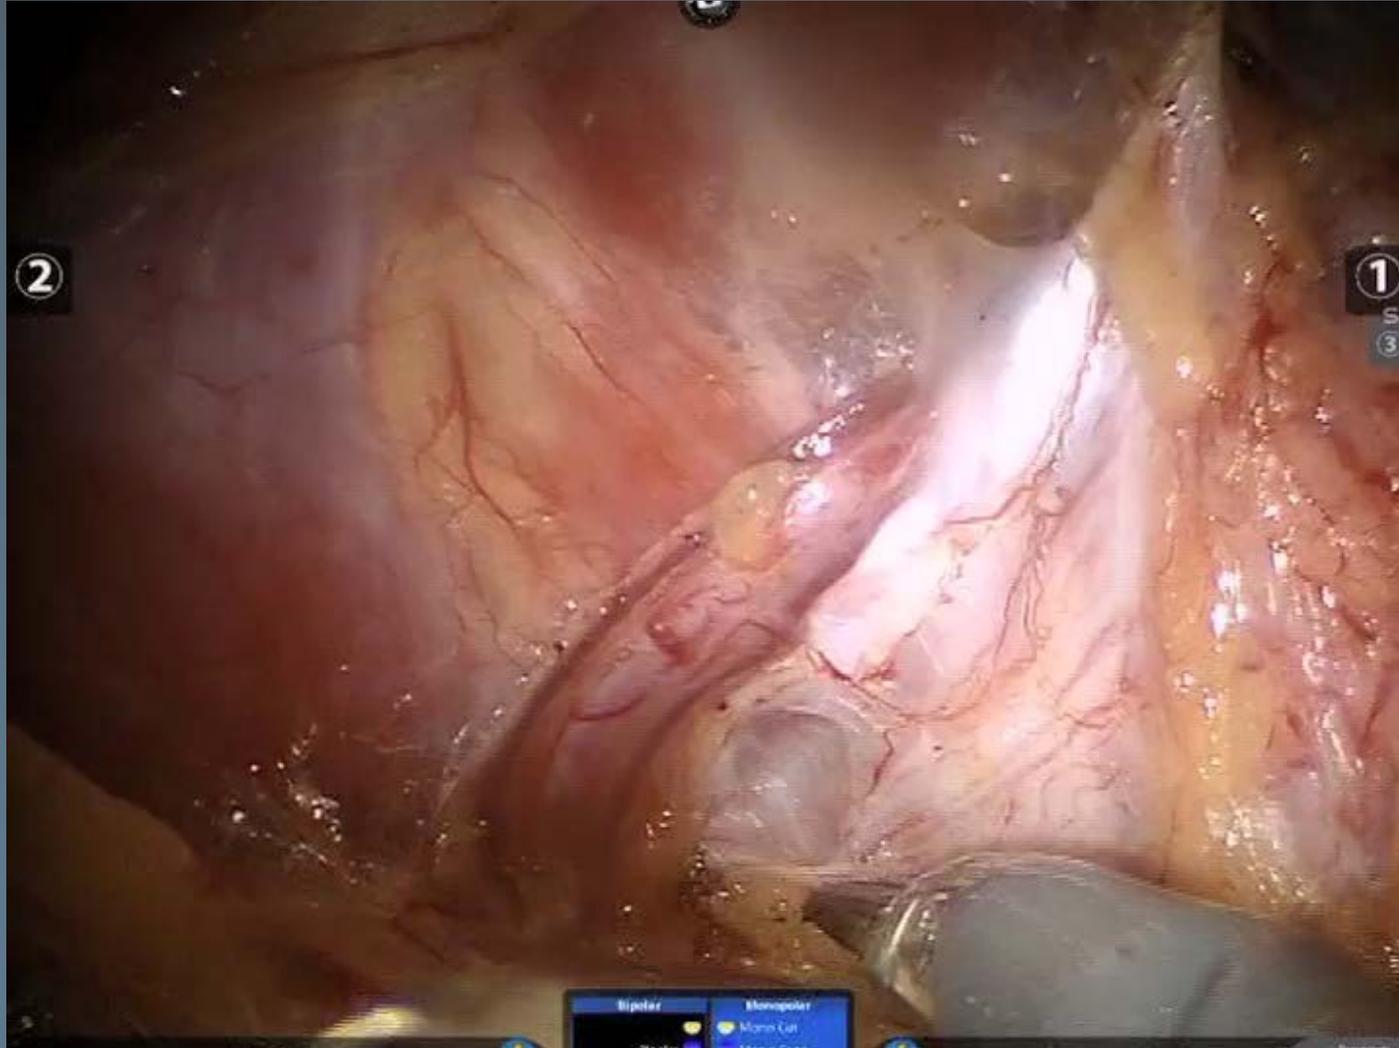

- Tip of seminal vesicles are close to NVB.
- Avoid lateral cautery.
- Use Hemo-Loc clips (5mm).

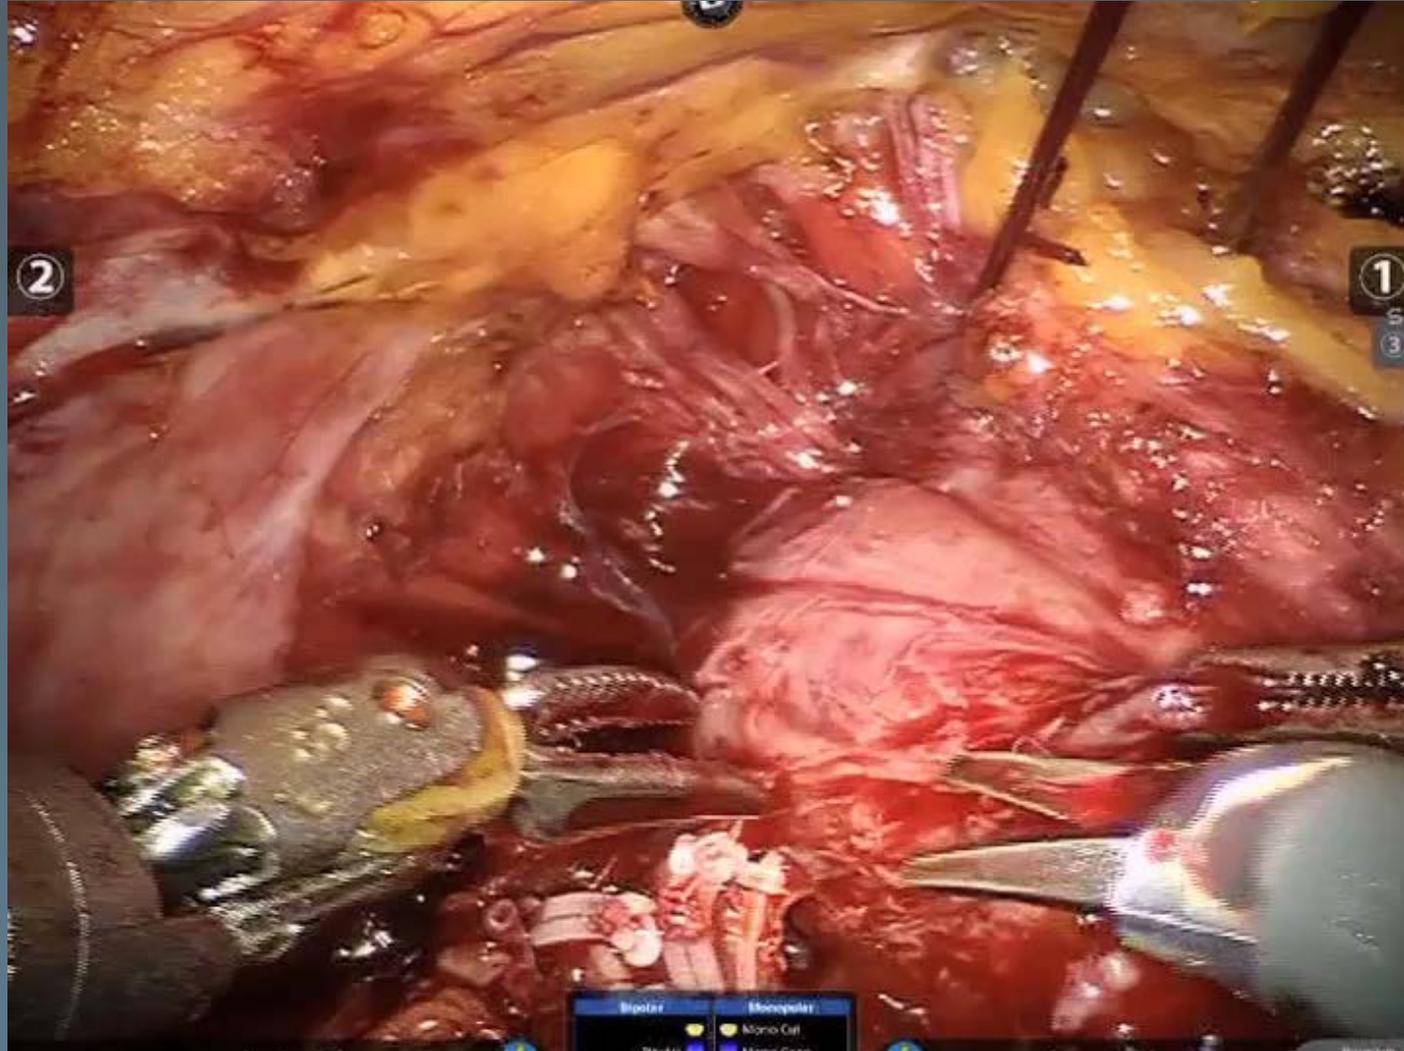

Vascular Supply

- Preserve arterial supply.
- Accessory Pudendal Artery. (In 30% op pts. 75% Apical and 25% Lateral).
- Internal Iliac branches during ELND.

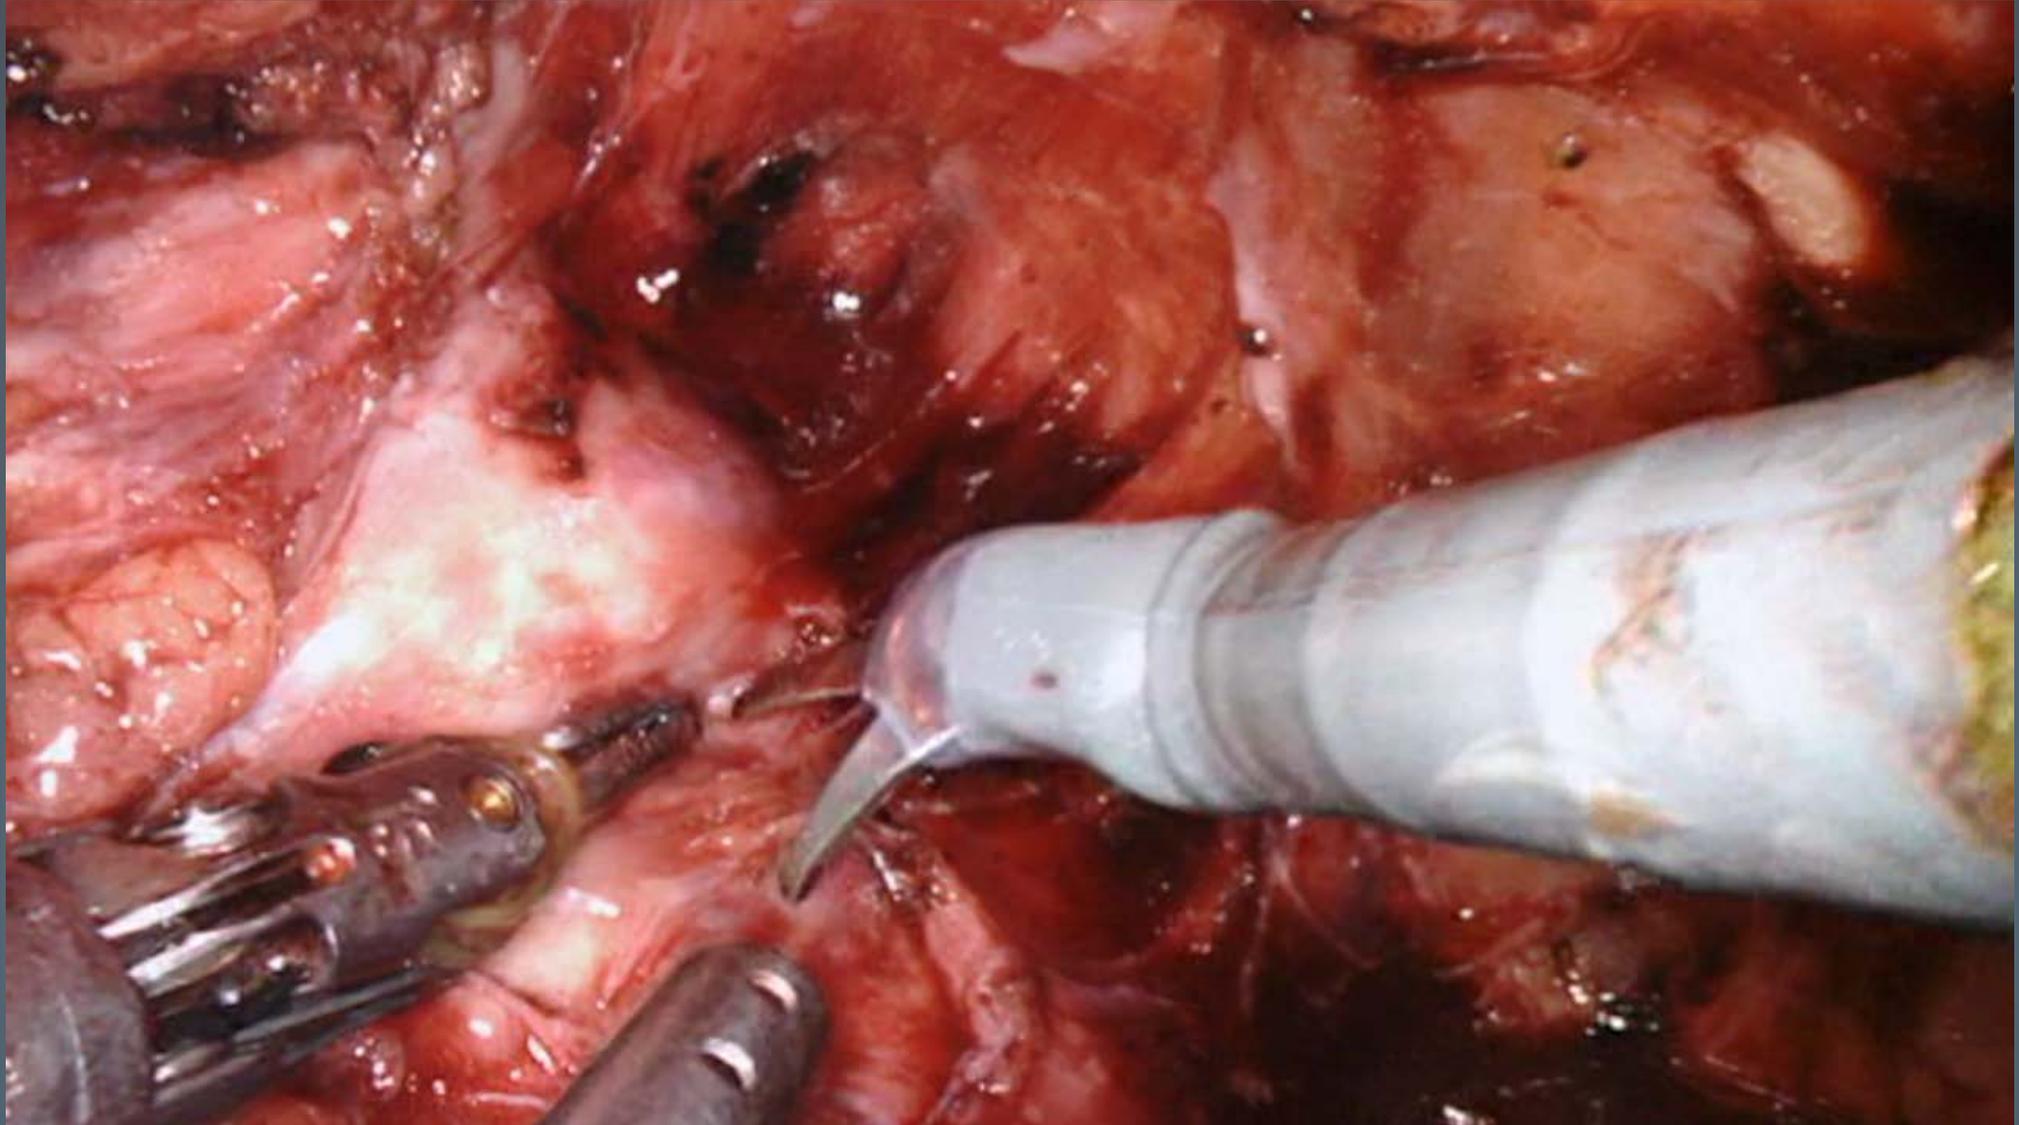

Vascular Supply

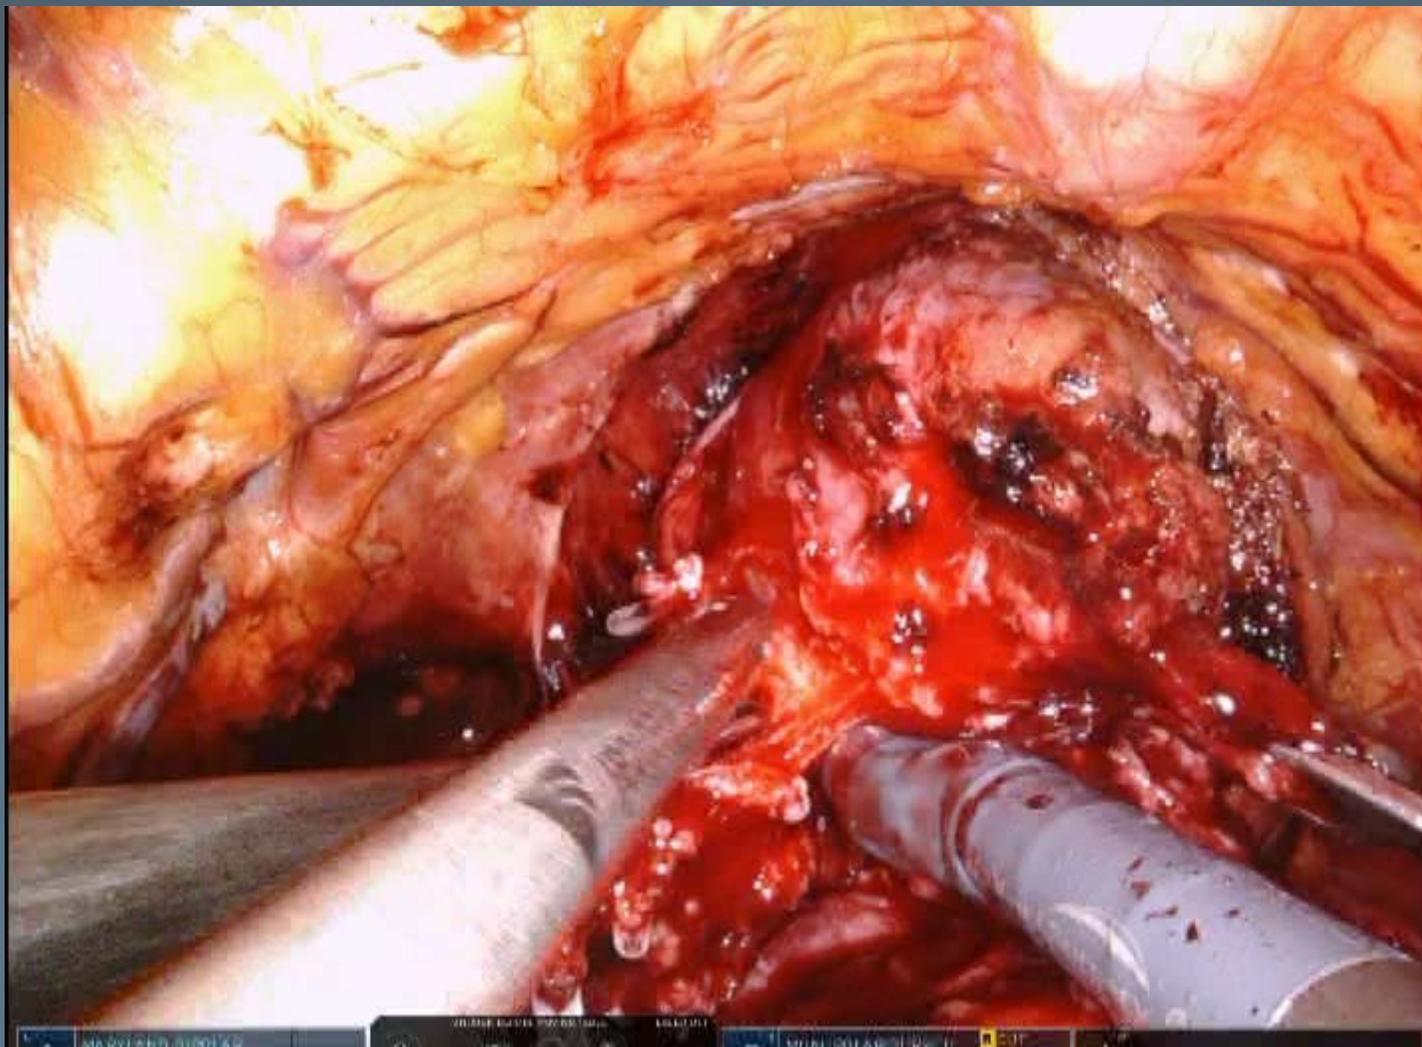

Venous plane nerve dissection

Incremental nerve sparing

Intrafascial after Multiple Biopsies

Thank You
